BULBS for Fall Planting

THESE Flower Bulbs produce remarkably beautiful flowers; many of them are delightfully fragrant and flower equally well under garden or house culture. Among other merits of these bulbs are the certainty and perfection with which they bloom and their ease of culture.

HOW AND WHEN TO ORDER

The best time to order is just as soon as you receive this catalog. We can always give your orders more of our personal attention if they come in before the rush of the fall trade. Please write as plainly as possible, as it helps avoid making mistakes in filling your orders.

ERRORS—We exercise the utmost care in filling orders, striving to do a little more than we offer; yet in the press of business errors sometimes occur, in which event we wish to be promptly notified of the fact and will make such corrections as will be satisfactory. Please keep copies of all your orders for comparison.

It will save confusion and delays if the name or initials of the same member of the family are used on the orders and correspondence.

Prices given in this catalog are for early orders and include postage if the order amounts to fifty cents or more. Later in the season, when our own importations are exhausted, we may not be able to always supply at these low prices, but will always send *full value* for the money you send us.

OUTDOOR FALL BULB CULTURE

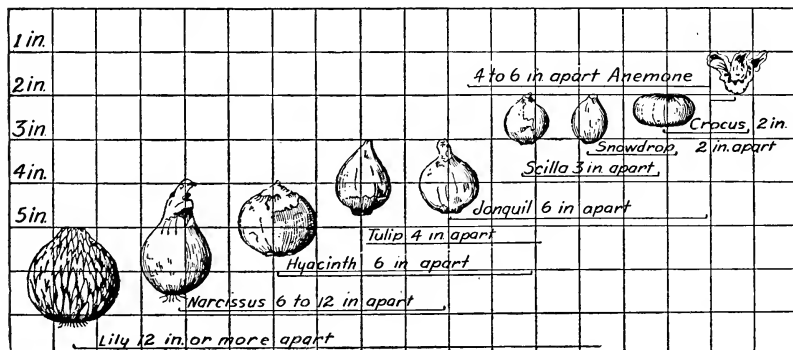

FOR OPEN-GROUND PLANTING—In beds, borders, or naturalized, a great many kinds of bulbs are hardy enough to withstand our winters. Most of the suitable sorts should be planted in the fall, and they will flower the following season, commencing in March or earlier with Snowdrops, Crocus, etc., which are followed in April with Hyacinths, Tulips, Daffodils, and a host of other bulbous beauties. In May appear late Tulips, late Narcissi, Lily-of-the-Valley, Bleeding Heart, etc., being followed in succession until frost, with Peonies, Iris, Hemerocallis, Lilies, etc.

TIME TO PLANT—Remember that the "fall" is the time to plant all spring flowering bulbs. They may be put in almost any time from October first until the ground freezes; in fact, we have succeeded with even later planting, but earlier planting brings the best success.

HOW TO PLANT—The soil should be well spaded, and the surface of the beds slightly raised at the center, so that no water will stand, but soak bed good with water when first put in and then later if it dries out. Also, water well in the spring about the time bulbs start, but don't let them stand in water. The soil will be better if enriched with well rotted manure or bone dust.

AFTER TREATMENT—All bulbs like a sunny exposure, and if protected from the north will bloom earlier. Before severe weather comes, cover the beds with several inches of leaves, straw, or coarse manure, removing it early in the spring. The bulbs do well for a number of years, without lifting or replanting. When through flowering the beds may be planted with shallow-rooted annuals, as nasturtiums, petunias, verbenas, etc. If necessary the bulbs may be taken up when the leaves begin to ripen, to be again replanted the coming fall.

DIAGRAM SHOWING DEPTH TO PLANT OUTDOORS

Bulbs indoors do not require such deep planting as indicated in the diagram, there being no danger from freezing and thawing to guard against

HYACINTHS

FOR OUTDOOR OR INDOOR PLANTING

The culture of Hyacinths is very easy. For early spring blooming out of doors the bulbs should be planted 5 inches deep. Plant in September, October, November, and December, as early as the bulbs can be had. After planting give the beds a covering of well rotted leaves or litter, or well rotted manure.

FOR POT CULTURE

Hyacinths are excellent for indoor growing. See that the pots are well drained and use the best soil possible. Plant the bulbs about an inch below the surface. Water thoroughly and put away in a dark cellar, or stand them out of doors and cover pot and all with about 8 to 10 inches of sand. Let them stand this way about 6 or 7 weeks or longer if necessary. The tops should be 4 inches high before brought in the house to the light. If brought in sooner the Hyacinths will make short, inferior flowers. A 4-inch pot will hold a good sized single bulb, and a 6- to 8-inch pot will hold 3 to 5 bulbs. The sprouts are yellow by keeping them covered in this way, but this does not matter, as they turn green quickly as soon as exposed to the light.

SINGLE EARLY TULIPS

October to December are the best months for planting, and to grow them to perfection the bulbs should be planted about five inches apart and three to five inches deep. Generally speaking, the single flowering varieties are by far the most brilliant and showy for outdoor planting. Tulips grow very well in pots from three to twelve bulbs in each pot or bowl.

The letters A, B, C, etc., following the varieties indicate their earliness of bloom—the A's flower together and are the earliest; B's follow before the A's are out of bloom, etc. The height is indicated in inches to aid in arranging the flower beds.

WYATT'S SUPERB DARWIN TULIPS

The late-flowering Darwin Tulip has out-classed all its predecessors in type, style and beauty, and is at the present the Queen of the Tulip family. It attains a height of two or three feet, with strong, heavy foliage, erect and robust stem, terminating in large and massive flowers. The colors of the Darwin embrace all the shades of white, pink, lilac, rose, scarlet, crimson and maroon, and most of the flowers show a particular satiny effect. Darwin Tulips are the finest among shrubby and perennials; they grow tall, bloom for a long time, and, if planted six to eight inches deep and left undisturbed, will bloom for many seasons. A great many of the varieties will force to good advantage and may be had in bloom during March.

Darwin Tulips are most valuable for permanent planting. With deep planting, 4 to 5 inches, in heavy soil and 6 inches in light soil, they will continue to bloom for years. They also thrive in semi-tropical climates, like those of California and the Southern States, better than the early Tulips.

	Doz.	100

FREESIAS

A desirable flower for forcing indoors, exceptionally fragrant.

PURITY. White, 50c. per doz.; \$3.00 per 100.
GENERAL PERSHING. Extra robust grower, 3 feet in height, with 4 to 5 long side laterals, large open flowers of lavender-pink, yellow lip and somewhat of a bronze cast. Doz., 65c; 100, \$5.00; 1,000, \$40.00.

AMARYLLIS

The coloring and markings are exquisite; the bulbs are very large, and are of sufficient strength and age to produce magnificent flowers during the winter or spring. They are probably the most magnificent and gorgeous bulbous plants known. Their immense flowers, richness of coloring and regal habits are simply incomparable. They throw up spikes from 2 to 3 feet high, bearing enormous wide petalled flowers, averaging 8 to 10 inches across and of great substance, some being of rich and glowing colors, others delicately shaded and superbly veined. Bulbs 50c. each; \$5.00 dozen.

CROCUS

Among the earliest to blossom in spring is this beautiful little flower, lifting its head almost before the snow has disappeared.

Absolutely hardy for outdoor culture and may be used for pot culture.

These are larger and stronger bulbs than the mixtures and produce correspondingly finer flowers.
MAMMOTH YELLOW. Fine canary yellow. Each, 4c; doz., 40c; 100, \$3.00.

MONT BLANC. Largest pure white. Each, 4c; doz., 40c; 100, \$3.00.

BARON VON BRUNOW. Dark blue. Each 4c; doz., 40c; 100, \$3.00.

SIR WALTER SCOTT. White, striped with purple. Each, 4c; doz., 40c; 100, \$3.00.

MIXED VARIETIES of Blue, Striped, White, Purple, Yellow, or all colors. Each, 3c; doz., 25c; 100, \$1.50.

Crocus

NARCISSUS AND DAFFODILS

There is no more beautiful flower than the Narcissus and Daffodil. They are easy to grow, and bloom in the spring when flowers are scarce. After blooming the tops die down and the bulbs stay dormant all during the summer, and then the following spring they come up and bloom again, and continue to bloom from year to year. All that is necessary is to dig them up occasionally and divide the roots, so that after you once buy these bulbs they continue to bloom indefinitely. There has been a great improvement in Narcissus and Daffodils in the past few years, and some of the flowers now grow to enormous size. We call your attention to the Van Waveren's Giant, Emperor, and Empress Narcissus, which are the largest and most beautiful flowers we have ever seen, and should be included in every collection. Plant the bulbs about 5 inches deep and about the same distance apart.

Large Single Trumpet Daffodils

KING ALFRED. The finest yellow trumpet. Each, 20c; doz., \$1.90; 100, \$13.00.

CHINESE SACRED LILY

Or Oriental Narcissus. Each, 25c.; doz., \$2.60.

CALLA LILY

Calla Lilies are general favorites, both for their beauty and the ease with which they are brought to perfection. Our bulbs are the best that we can procure.

WHITE. This large white general favorite is one of the easiest bulbs to grow. Give rich soil, water, light, and heat in abundance, and excellent results will follow. In the summer turn the pots on side and let plant rest, and then repot in September in fresh soil. Each, 25c.; 3 for 50c.

YELLOW. The Yellow Calla is an entirely new variety. Except in color it is almost identical with the white. It is a beautiful, rich, golden yellow, and is well worthy of your consideration. Cultural directions same as for the white one. Each, 25c.; 3 for 75c.

LILY OF THE VALLEY

Bearing slender stems set with tiny white bells, delightfully fragrant, do well in shady situations. Flower each season without attention. Doz., 50c.; 100, \$3.50.

Paper White Narcissus

HARDY LILIES

For color, fragrance, beauty, and variety of form, nothing can equal these grand flowers; whether grown in pots or grouped in the hardy plant border, where their hardiness makes them so desirable, they are always an object of beauty.

Lily Bulbs, being of late maturity, are not ready before October, November, and December (the best time to plant them).

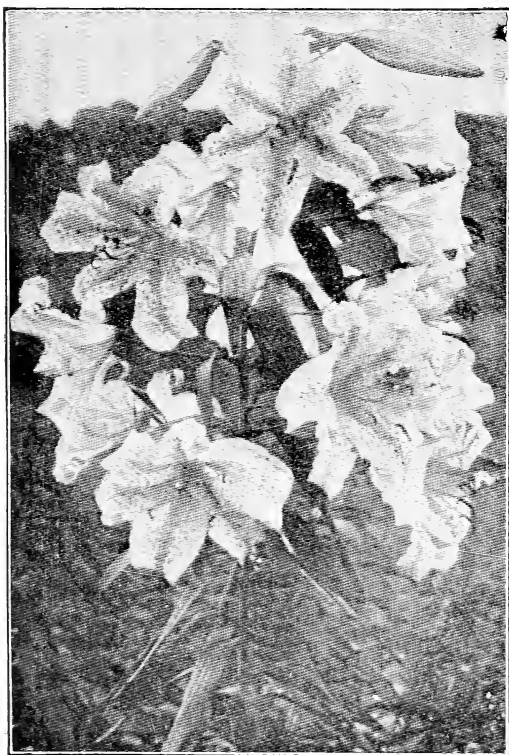

LILIUM AURATUM (the Gold-Banded Lily of Japan). The most beautiful variety of all the Lily family; should be in every garden. Flowers white, dotted crimson, with a clear golden band running through the center of each petal; very fragrant. A splendid lily for pots, or for planting out in the shrub or plant borders. In either way it is very handsome, its large flowers and delicious perfume make it one of the most valuable. Mammoth bulbs, 40c. each; \$4.00 dozen.

LILIUM SPECIOSUM RUBRUM. Large bulbs producing attractive white flowers shaded and spotted with rose and red. Mammoth bulbs, 50c. each; \$5.00 dozen.

SUPERBUM (Our Native Turk's Cap Lily). Rich orange red petals, tipped red and dark spotted. 4 to 6 feet high. Blooms July and August. Each, 25c.; dozen, \$2.50.

TIGRINUM SPLENDENS (Tiger Lily). The grandest of the Tiger Lilies. Black polished stems, sometimes 6 feet high. Very large pyramids of flowers, orange red spotted with black. 3 to 5 feet high. Blooms in August. Each, 25c.; dozen, \$2.50; 100, \$10.00.

CANDIDUM (Madonna Lily). One of the best hardy Lilies. Flowers pure white, large, delightful fragrance. Blooms in June. Each, 35c.; dozen, \$3.00.

Lilium Auratum

PEONIES, ARISTOCRAT OF FLOWERS

Planted This Fall Will Bloom Next Spring

The wonderful improvements made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest roses in size, form and color, are produced in great abundance.
